Subject: our security

Sen. Shelby,

I feel it is my duty as an American citizen to write you this letter because I feel I speak for my family and friends. All of my life I have worked and struggled to achieve the American Dream and to secure my and my families future. I have paid my taxes, and when I couldn't pay my taxes I watched them (the I.R.S.) seize my house, car and etc, etc..Now I become aware of practice of fraudulent stock transactions, namely naked short selling that has been documented and proven and not a blind eye or open ear will hear the hue and cry of us the little guy to even start an investigation. Sir, this is shameless at best. Hedge funds can operate in any country and pay no taxes and not a whisper about going after them, because it is easier to grab the assets of us who do not have the means or the moral fibre to be a crook. Please sir, start looking out for us the people that make this country work, and are hoping our assets are not fraudulent book entries that have no value. I hope this letter is read and given honest thought.

Sincerely
Dan Somers
